ABOUT US

Aurumax Tech Solutions Inc. is a forward-thinking IT solutions provider committed to transforming businesses through innovative technologies. We specialize in RFID systems, security solutions, and IT infrastructure services—offering end-to-end support tailored to the needs of modern organizations. Our core expertise spans RFID consultancy, design, installation, and supply, alongside the development of smart software applications that integrate RFID technology to boost operational efficiency and automation.

We also deliver a wide range of security and infrastructure solutions, including CCTV surveillance, access control systems, FDAS, structured cabling, and fiber optic installations—ensuring organizations are equipped with reliable and scalable systems for safety and connectivity.

KEY FACTORS

Our success is driven by the core values that shape our approach—Desire, Responsibility, Relations, Creativity, Development, and Concept. These principles guide our work, fuel innovation, and strengthen our commitment to delivering impactful technology solutions.

01

Desire

Our strong desire to innovate drives us to create smart, secure, and impactful technology solutions that help businesses thrive.

02

Responsibility

We uphold responsibility through accountable practices, reliable service, and a commitment to delivering quality solutions with integrity.

03

Relations

We value strong, collaborative relationships with our clients and partners, built on trust, transparency, and mutual growth.

04

Creative

We approach every solution with creativity, combining innovation and fresh thinking to solve complex challenges and deliver standout results.

05

Development

We are committed to continuous development—advancing our technologies, skills, and services to meet the evolving needs of our clients and the industry.

06

Concept

Every solution we deliver is grounded in a clear, strategic concept that aligns with our client's goals and turns ideas into practical, high-impact outcomes.

PROBLEMS

Aurumax Tech Solutions Inc. helps solve real-world challenges faced by businesses and society—ranging from inefficient processes and security risks to digital gaps and post-pandemic disruptions—through smart, reliable, and future-ready technology solutions.

The Society

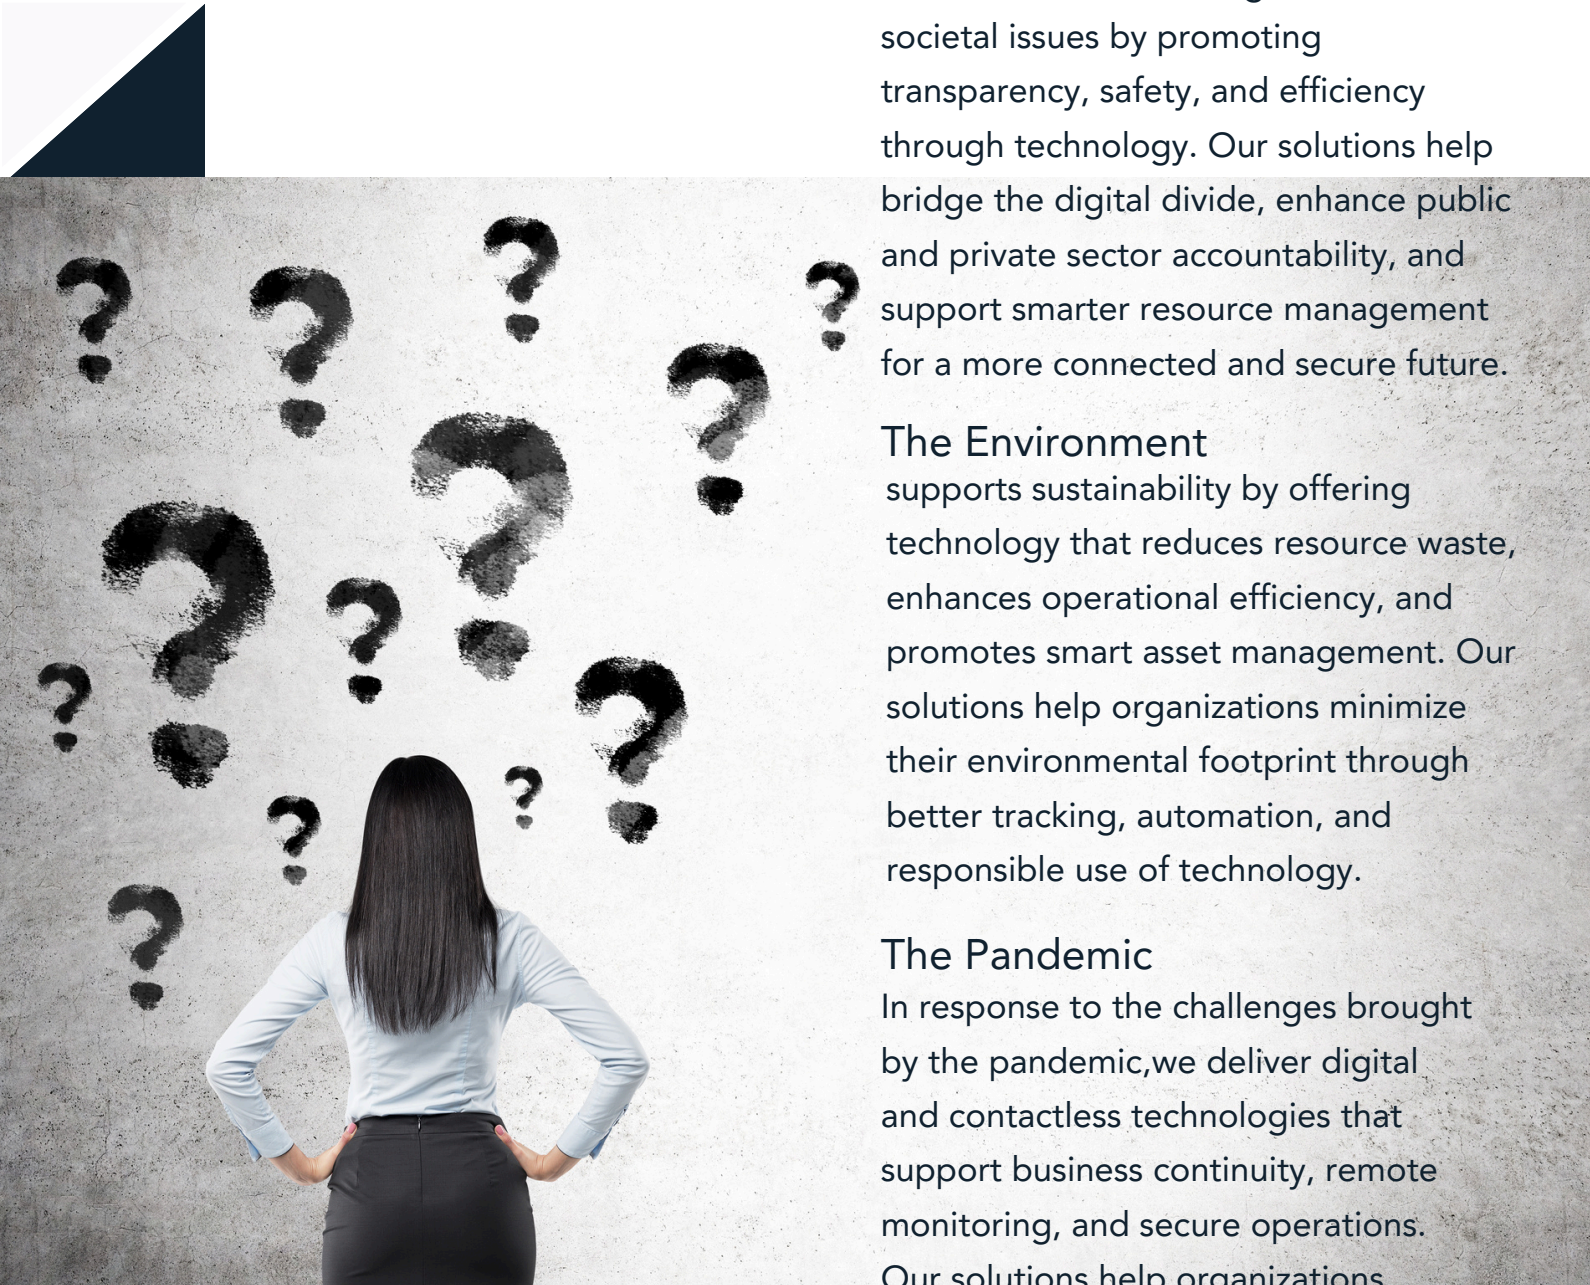

We contribute to solving broader societal issues by promoting transparency, safety, and efficiency through technology. Our solutions help bridge the digital divide, enhance public and private sector accountability, and support smarter resource management for a more connected and secure future.

The Environment

supports sustainability by offering technology that reduces resource waste, enhances operational efficiency, and promotes smart asset management. Our solutions help organizations minimize their environmental footprint through better tracking, automation, and responsible use of technology.

The Pandemic

In response to the challenges brought by the pandemic, we deliver digital and contactless technologies that support business continuity, remote monitoring, and secure operations. Our solutions help organizations adapt to the new normal with greater resilience, efficiency, and safety.

SOLUTIONS

A Brief Story About The Solutions

Aurumax Tech Solutions Inc. provides innovative, end-to-end IT solutions—from RFID systems and asset management to security infrastructure and digital transformation tools—empowering businesses and institutions to operate smarter, safer, and more efficiently in a rapidly evolving world.

Market Driven Basic Implementation

Aurumax Tech Solutions Inc. delivers practical, scalable solutions tailored to real market needs—ensuring fast deployment, ease of use, and measurable impact for businesses seeking immediate technological upgrades without complex transitions.

Decrease Industry GAP

Aurumax Tech Solutions Inc. is committed to bridging the gap between traditional operations and modern technology by providing accessible, innovative solutions that help businesses across industries transition smoothly into the digital age.

solution

FixTrack

- Fixtrack is an innovative asset management system that seamlessly integrates RFID technology to enhance tracking and management of various assets. By utilizing RFID tags, Fixtrack enables real-time visibility into asset location and status, significantly improving efficiency and reducing loss.

WareTrack

- WareTrack is a cutting-edge RFID warehouse management system designed to streamline inventory processes and enhance operational efficiency. By leveraging radio-frequency identification technology, WareTrack enables businesses to track and manage their inventory with unparalleled accuracy.

Event Management System

- EMS is a smart event management software integrated with RFID technology, designed to streamline event operations—from automated attendee tracking and access control to real-time analytics—ensuring a seamless, secure, and efficient event experience.

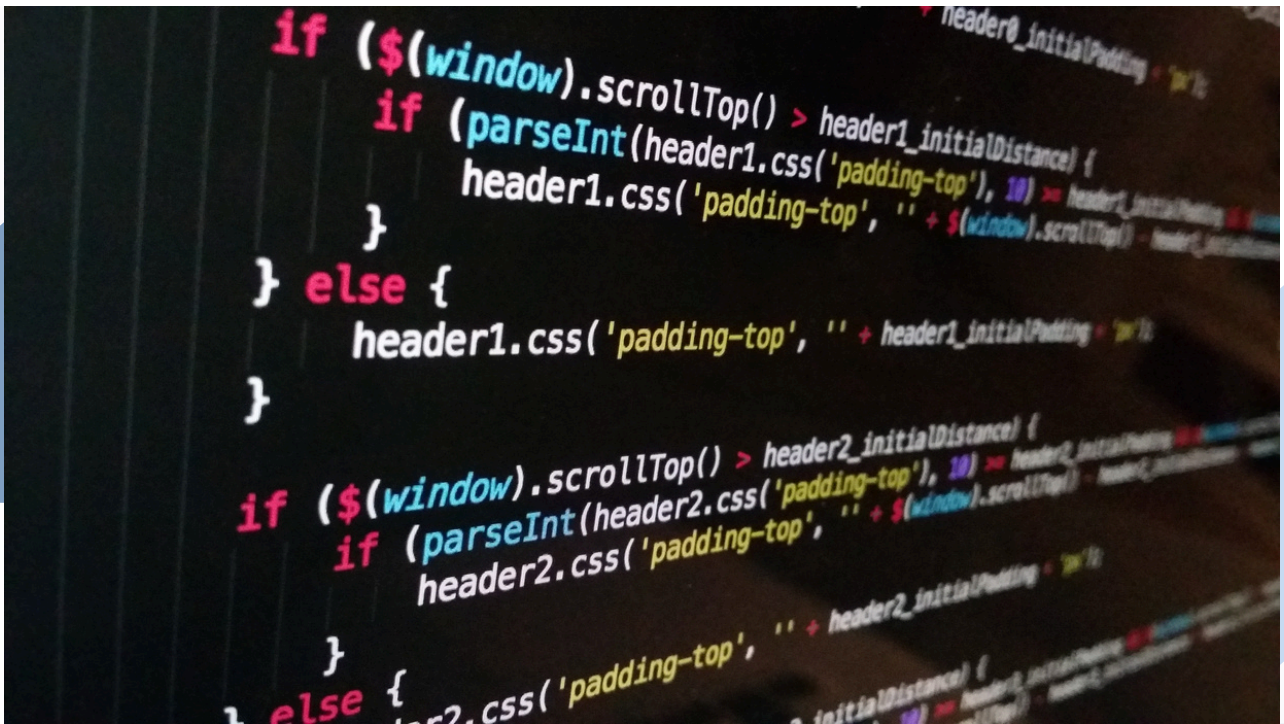

Tagify

- Tagify is a versatile asset management application designed specifically for Android mobile devices. It streamlines the process of tracking and managing assets, making it easier for users to monitor their inventory on the go. The app is compatible with selected handheld RFID readers, allowing for efficient asset scanning and data retrieval.

KEY SERVICE

A server-based RFID integration benefits a company by centralizing data management, improving efficiency, and enabling real-time tracking of assets or inventory. It ensures seamless communication between RFID readers and business systems, allowing for accurate, automated data capture and streamlined operations. This leads to reduced human error, enhanced security, faster decision-making, and better overall visibility across the organization.

RFID Integration

RFID integration enables automated identification and tracking of assets, people, or inventory—seamlessly connecting physical operations with digital systems to improve accuracy, efficiency, and real-time visibility. We can help you integrate RFID into your existing systems, eliminating the need to invest in entirely new RFID-ready platforms.

Software Development

Aurumax Tech Solutions Inc. designs and develops custom software applications tailored to your business needs—enhancing efficiency, automation, and user experience. Our team ensures seamless integration with existing systems, including RFID and other emerging technologies.

FIXTRACK LIVE

FixTrack Live is our cloud-based asset management software designed to work seamlessly with RFID technology—providing real-time tracking, inventory control, and data-driven insights to help businesses manage assets efficiently anytime, anywhere.

Software As A Service

- **Real-Time RFID Tracking:** Monitor and manage assets instantly with accurate, automated data capture.
- **Cloud-Based Convenience:** Access your system anytime, anywhere—no need for on-site servers or complex installations.
- **Cost-Efficient Subscription Model:** Enjoy lower upfront costs, regular updates, and scalable features as your needs grow.
- **Automatic Updates and Support:** Always stay current with the latest features and security enhancements, backed by expert support.

OUR CAPABILITIES

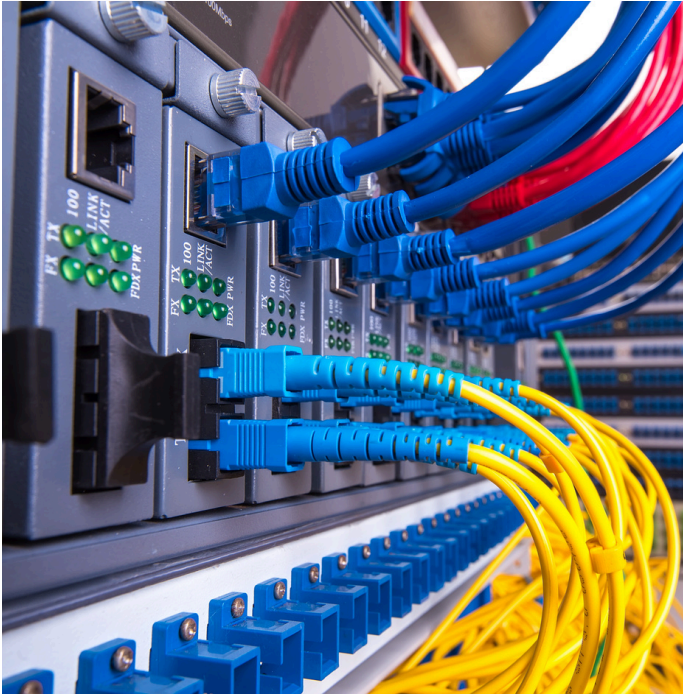

CCTV and Access Control System

We provide advanced CCTV surveillance and access control solutions to enhance security, monitor activity, and manage entry across facilities—ensuring safety, accountability, and peace of mind for your business operations.

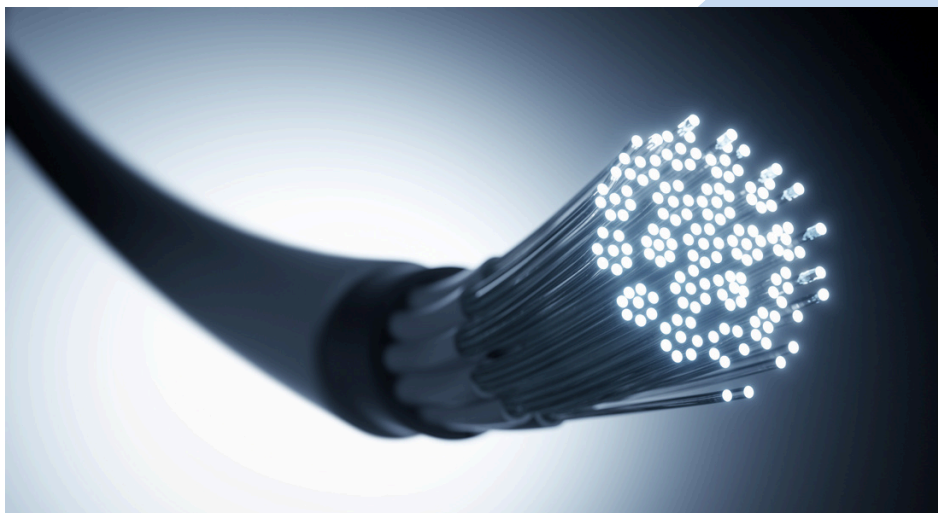

OUR CAPABILITIES

Structured Cabling and Fiber Optic Cabling

We offer reliable structured cabling and high-speed fiber optic solutions that serve as the backbone of your IT infrastructure—ensuring fast, stable, and scalable connectivity for voice, data, and network systems.

OUR CAPABILITIES

FDAS and Earthquake Recording Device

We offer reliable Fire Detection and Alarm Systems (FDAS) and Earthquake Recording Instruments (ERI) to enhance building safety and emergency preparedness—ensuring early detection, real-time monitoring, and compliance with safety regulations for both fire and seismic events.
